

2011 FLEA, TICK, AND HEARTWORM PRODUCT PRICE LIST

We understand that caring for pets can be expensive, and trying to save money on heartworm, flea and tick products by ordering through an Internet warehouse seems logical. However, as with much of the internet, things are not always what they seem!

First, we actually price our products competitively with internet sources and if you compare our **current prices (listed below)** you will find that *we frequently charge less*, especially when you factor in the *specials* we are able to provide

Second, you can be sure that any products purchased from us come directly from the manufacturer and not secondary and potentially counterfeit sources. Unfortunately we have seen many cases of “product failure” in flea and tick products purchased through secondary channels. Also, we stand behind all products purchased at our office with a **100% satisfaction guarantee** that does not come with outside Internet pharmacy prescriptions.

Third, we are a high-tech, full-service hospital, with a very knowledgeable staff here to care for your pets in sickness and in health. Spending your pet care dollars with an out-of-state Internet firm does little to support the “hometown” facility you may need to call on in the future.

Finally, products purchased through our office by phone or through our secure website portal (www.valleyvethospital.com) can be picked up in person or **shipped to your home at no additional charge regardless of order size.**

We hope you find this information of interest and consider all these factors in making your pet product purchase decisions Thank you for your understanding and continued support.

Ted A. Diamond DVM and
Staff of Valley Veterinary Hospital
